

# THE KNOWN UNIVERSE

Discovering the Science of Astronomy  
through the History of Astronomy

Sixth Edition

written and illustrated by  
Christopher M. Graney  
Professor of Physics  
Jefferson Community & Technical College

Louisville, Kentucky, USA

© 2019

## CONTENTS

### PART ONE -- THE CENTER OF THE KNOWN UNIVERSE

Chapter 1 -- Why astronomy and why its history

Chapter 2 -- What the heavens show us, and why anyone would care

Chapter 3 -- A longer look at the heavens

Chapter 4 -- Aristotle

Chapter 5 -- The wandering stars

Chapter 6 -- Geocentrism and heliocentrism

### PART TWO -- THE WORKINGS OF THE KNOWN UNIVERSE

Chapter 7 -- Momentum

Chapter 8 -- Copernicus

Chapter 9 -- Sensory experience and necessary demonstrations

Chapter 10 -- The campaign around Copernicus

Chapter 11 -- Gravity and guns

Chapter 12 -- Stars and planets

### PART THREE -- THE AGE OF THE KNOWN UNIVERSE

Chapter 13 -- Aristotle and Ussher

Chapter 14 -- Infinite universe

Chapter 15 -- Nebulae and standard candles

Chapter 16 -- Giant, yet tiny

Chapter 17 -- Hundred yard universe

Chapter 18 -- The beginning of time

## CONTENTS (continued)

### PART FOUR -- THE INHABITANTS OF THE KNOWN UNIVERSE

Chapter 19 -- Other worlds

Chapter 20 -- The Martians

Chapter 21 -- Aliens

Chapter 22 -- SETI

Chapter 23 -- The galactic empire

Chapter 24 -- Conclusion and acknowledgments

### APPENDICES

Appendix A -- How Aristarchus determined the size of the sun

Appendix B -- Better than the eye: The telescope

Appendix C -- The problem with The Past

Appendix D -- Leavitt's stars
